

Education

University Of Alberta	Edmonton, AB	September 2020 – April 2025
- BSc in Computing Science Specialization in Software Practice - Relevant Coursework: Programming Languages; File and Database Management; Operations Management; Algorithms; Computer Organization and Architecture; Statistics; Reinforcement Learning (AI)		

Work Experience

Faction Four Systems	Sherwood Park, AB	2025-2026
-----------------------------	--------------------------	------------------

System Developer

- Completed back-end integration from app to public safety agency and government data.
- Created multiple scripts to enhance workflows.
- Led and documented the Android app and plugin update process through publishing for beta testing.

Suncor Energy	Sherwood Park, AB	2023-2024
----------------------	--------------------------	------------------

Digital Student – SCADA/Automation Team

- Conducted comprehensive risk analysis documentation for critical infrastructure and completed Alarm Rationalization Documentation adhering to procedures.
- Collaborated with control room operators to update SCADA alarms and minimize alarm fatigue.
- Facilitated consensus for a major software upgrade between companies.
- Published a feasibility study for integrating an Artificial Intelligence assistant to assist control room operators as part of building a business case.

Heartland Alliance Church	Sherwood Park, AB	2022
----------------------------------	--------------------------	-------------

Groundskeeper

- Kept the property in excellent condition, using and maintaining multiple new tools/machinery safely.

Volunteer Positions: Activities Supervisor, Technical Operator, Youth Leader, Worship Band Member

Competencies

Programming

Cyber Eagles Robotics Team - Programmer	2019-2020
--	------------------

- Created and programmed a robot for both driver-controlled and autonomous movements.
- Qualified for the World Championship in Houston TX in two consecutive years.
- Placed in the top 50% of teams at the World Championship 2019, volunteered as queuer in 2024.

Leadership

Robotics Coach	2023-Present
-----------------------	---------------------

- Teaching junior high students how to program a competitive robot in Java.
- Teaching students the importance of teamwork and how to collaborate with others and solve problems.

Robotics Camps	2019-2020
-----------------------	------------------

- Taught children how to use a form of block code with mBots to complete challenges.
- Delegated responsibilities between team members to ensure efficient set up and preparation time.

Projects

FoodUpcycling Engagement Centre - Web App	University of Alberta, Fall 2024
- Developed front end of a fully usable delivery and volunteer management system. - Applied Agile software development practices to collaborate with other team members.	
Twitch Chatbots in Python	2022, 2025
- Created a chatbot with an integrated LLM that interacted with users during Twitch livestreams. - Chatbot acted as a moderator and removed over 1000 bot accounts from livestream chats.	

Languages and Technologies

- Proficient: Python, C++, Java, C#, SQL Familiar: C, R, MongoDB
- Android Studio, Visual Studio, Vim, Excel, Unix, Windows, GitHub, Git, Flutter, HuggingFace, SCADA, PI

Additional Interests: Sports (Hockey, Soccer, Badminton), Music (Electric Guitar), Languages (Learning French).
